# Dik dik

 Kirk's dik dik

(Photo Philippe Guerlet)

Appartenant à la famille des bovidés, le dik dik est une antilope miniature ne dépassant pas les 43 cm au garrot. Originaire d'Afrique de l'Est, ce petit herbivore, reconnaissable notamment, à ces courtes cornes et à son point noir au niveau de l'oeil, est un animal semi nocturne dont le repas se constitue essentiellement de fruits, de feuilles et de jeunes pousses. Très vif, le dik dik fuit ses prédateurs grâce à une technique très rodé, en s'immobilisant devant eux et en

fuyant au dernier moment. Il répète alors l'opération, au grand dam de son adversaire, qui las de ce manège, abandonne la partie.

**NOM** : Dik dik (Madoqua kiri)

**CLASSE** : [Mammifères](#)

**ORDRE** : [Artiodactyle](#)

**FAMILLE** : [Bovidés](#)

**TAILLE** : 50 à 70 cm, 30 à 43 cm au garrot.
